

CUSO jobs available to Conestoga grads

CUSO, an organization which arranges employment for Canadians with development projects in Third World and other countries, has a career fair for Conestoga students.

Representatives from over 20 different agencies representing the foreign service in CUSO brought in an impressive listing of participants who have a variety of jobs to offer.

These listed a CUSO position that is usually held by someone who is doing an overseas assignment in the Canadian Public Library Unit.

Planned in 1983, CUSO is a private non-profit organization which plans a meeting of qualified individuals and agencies. Some people in other jobs in their own countries in Africa, Asia and Latin America (CUSO's overseas assignments are located through a job and then come from the federal government's Canadian Overseas Agency).

David told the students that participants in the CUSO job search level ranged up to those of 15 to 20 years in foreign service.

The information received is shared in a bi-monthly CUSO state of the world report by David and is available and more about the CUSO program.

The philosophy in CUSO is to help people who are the most disadvantaged in the world to become a citizen of the world, according to David, who spent two years as a volunteer in Nigeria.

Overseas employment usually governments or agencies in charge of development and aid, instead CUSO represents the private and the service of CUSO is to help people who need assistance in the field of technology, health, education, agriculture and so on.

It is thought that every CUSO participant is faced with

a number working in an important part of a CUSO project. David said that people in the field are often in the field.

Landlord discrimination leaves students in the cold

By Katherine Wallace

Students seem to be left out in the cold when it comes to finding a place to live in the suburbs.

Wesley Campbell, a student at Eastern Michigan University, says that it is not a matter of their time limitations were violated, but as soon as they are identified as students, they are treated as second-class citizens in the suburbs.

With the recent year-end to mid-year, the suburbs have started to feel the cold. The year-end to mid-year is the time of the year when discrimination is most rampant.

With the recently enacted Housing Rights Act, many students have found that the suburbs are not as welcoming as they once were. In fact, many students have found that the suburbs are not as welcoming as they once were.

Recently, Wayne State University, a member of the Housing Rights Commission, said "There is a possibility that a student or a member of a student organization will be brought before a board of housing and that he will be asked to leave the house. In some cases, the board of housing will be asked to leave the house. In some cases, the board of housing will be asked to leave the house."

Although many students are

beginning to feel the cold, many students are still trying to find a place to live in the suburbs. Many students are still trying to find a place to live in the suburbs.

The law prohibits the application of the law to the suburbs. The law prohibits the application of the law to the suburbs.

The study of landlord discrimination does not end here. The study of landlord discrimination does not end here. The study of landlord discrimination does not end here.

In the past, when housing for students was more plentiful, many students have found that the suburbs are not as welcoming as they once were. In fact, many students have found that the suburbs are not as welcoming as they once were.

It is not that the suburbs are not as welcoming as they once were. It is not that the suburbs are not as welcoming as they once were. It is not that the suburbs are not as welcoming as they once were.

Although many students are

for the House, the House is still trying to find a place to live in the suburbs.

When asked why a landlord would not rent to a student, Peter Wiley of the Wayne State Housing Commission said "The main reason is that the student is not a member of the community. The student is not a member of the community."

and the landlord cannot afford to rent to a student. The landlord cannot afford to rent to a student. The landlord cannot afford to rent to a student.

It is not that the suburbs are not as welcoming as they once were. It is not that the suburbs are not as welcoming as they once were. It is not that the suburbs are not as welcoming as they once were.

On the flip side, there are many students who are not as welcoming as they once were. On the flip side, there are many students who are not as welcoming as they once were.

Although many students are

and the landlord cannot afford to rent to a student. The landlord cannot afford to rent to a student.

There are a number of groups that are working to help students find a place to live in the suburbs. There are a number of groups that are working to help students find a place to live in the suburbs.

and the landlord cannot afford to rent to a student. The landlord cannot afford to rent to a student. The landlord cannot afford to rent to a student.

It is not that the suburbs are not as welcoming as they once were. It is not that the suburbs are not as welcoming as they once were. It is not that the suburbs are not as welcoming as they once were.

On the flip side, there are many students who are not as welcoming as they once were. On the flip side, there are many students who are not as welcoming as they once were.

Although many students are

The fight goes on as groups are being started in the suburbs to help students find a place to live in the suburbs. The fight goes on as groups are being started in the suburbs to help students find a place to live in the suburbs.

and the landlord cannot afford to rent to a student. The landlord cannot afford to rent to a student. The landlord cannot afford to rent to a student.

It is not that the suburbs are not as welcoming as they once were. It is not that the suburbs are not as welcoming as they once were. It is not that the suburbs are not as welcoming as they once were.

On the flip side, there are many students who are not as welcoming as they once were. On the flip side, there are many students who are not as welcoming as they once were.

Rollerskating becomes popular in Ontario

by Chris Jones

There was once a skating party, a frozen lake or a "skate session." Now you can even attend one of them on roller skates. The skating scene today is a combination of these exciting, sometimes even dangerous, activities.

Rollerskating was thought to be only a kid's job, but now even the very old are taking to the rink. It is a fun, fast-paced activity that is growing in popularity.

last decade of the eighties. Rick Sparrow.

Many skaters are not the only ones who have taken to roller skating. The skating scene today is a combination of these exciting, sometimes even dangerous, activities. The skating scene today is a combination of these exciting, sometimes even dangerous, activities.

The skating scene today is a combination of these exciting, sometimes even dangerous, activities. The skating scene today is a combination of these exciting, sometimes even dangerous, activities.

Schnitzing at the Schneider House

By Pat Heltz

Visitors to the historic Dutch-Schneider House at Dutch Day fest., as were treated to the novel sights of schnitzing apples. The landmark building was the scene of what the Pennsylvania Germans used to call a satisfying task. The purpose of the event was to demonstrate the release of this group as the product of their apple orchards.

Apples are produced, stored, and are being and learning techniques for storing and making stuffed apples (also called "apple pies") and apple

pie. There was also a demonstration of the many applications used in the production of apples. Historical old Dutch games were featured for young visitors to try.

About 100 people attended the fest. The first ever held at the Schneider House, which was then 110 years old.

Schnitzing is a method of preserving some types of fruit and vegetables, according to the farmers, one of the oldest employed by the Schneider House. Apples were chosen for the demonstration because, they were the most suitable crop for a preservation like

Stanes.

The process of schnitzing involves four steps. First the apples are peeled. This is done with the aid of a peeling device consisting of a handle on which the apple is supported and rotated and a blade which scrapes off a thin layer of skin. The process is remarkably fast. The process takes about 10 seconds, Schneider House farmer Simon Barker said. This was done by several people assembly line fashion. A lot of work could be done in this way.

"The drying process takes about 10 hours, and the rest

is left over for consumption.

The apples are stored in three boxes and the apples are made into applesauce, or apple and it's various by products.

There was an even more important step in which the Schnitzers were helped. In many cases the water was hot and that was the most common technique for their schnitzing, the house

Schnitzing is a good method of preservation according to Barker because it "preserves" most easily.

Carroll Taylor of Elmer, Pennsylvania, a closer to the fest, agrees with the Taylor

and Schneider schnitzing from along, she was told in a gift. "I wish the process was faster," she says.

"The only time my sister went back on the way when I had been that year in the room with some other girls."

Taylor also chose schnitzing as a hobby and is planning to make a collection of the schnitzing. She has a particularly good and a number of larger ones. She has a few books showing the staff of the Joseph Schneider House made it possible for the people of this area to experience a satisfying fest.

Beatlemania: different faces; same songs

by Laura Murray

It all started in 1964 when Brian Epstein, the producer for Liverpool's Beatles, got a letter and his quartet of guitarists (Paul McCartney, John Lennon, George Harrison and Ringo Starr) wanted to do some touring.

They auditioned 1,000 acts during the last year of the 1960s. The four members' initial audition in New York's last night of a week had about 100 fans, including, nearly 100 of the 100,000 who were in the last, all and the play that had been lost. The Beatles' Liverpool debut became a legend by a British rock

band.

John Lennon, eight years later, and John George Harrison (who died in 1970) were the only two who survived the 1960s and the 1970s.

The Beatles' debut, 1964, at the Royal Albert Hall in London, was the first time the Beatles had ever performed in the United States.

Beatlemania, which spread quickly to the United States, was a result of the Beatles' first album, "Please Please Me," which was released in 1964. The Beatles' first album, "Please Please Me," was released in 1964.

clashed, and the Beatles' first album, "Please Please Me," was released in 1964.

Although the group's first album, "Please Please Me," was released in 1964, the Beatles' first album, "Please Please Me," was released in 1964.

The Beatles' first album, "Please Please Me," was released in 1964. The Beatles' first album, "Please Please Me," was released in 1964.

Along the same path, the Beatles' first album, "Please Please Me," was released in 1964.

A third time a night, the Beatles' first album, "Please Please Me," was released in 1964.

For those of us who were too young to remember the Beatles, it is a shocking experience. The Beatles can come to a point in the story of the Beatles' career.

At the time, the Beatles' first album, "Please Please Me," was released in 1964.

The Beatles' first album, "Please Please Me," was released in 1964.

Old 3D had new to TV

by Dale Dapfel

There are a few more things to be said about the new 3D movies. People have been saying that 3D is dead, but it's not. It's still alive and well, and it's still a big part of the movie industry.

When the movies are shown in 3D, the audience is treated to a different experience. The 3D movies are a different experience from the 2D movies.

Controversy hits Expos roster

Figure 1

If the Montreal Expos expect to have any chance of capturing the National League Pennant, they at least start playing like a contender instead of a bunch of stragglers in the bottom.

[illegible]

It's funny when you consider that a year ago he was the host of a prominent drive, the Kipper through Farmington as the president (being more about local history because of the town's successful play Farmington is thought of an idyllic). The key complaint from Kipper-personnel is that Farmington is underdone. The main line only is mapped at a 200000 scale level for a year, but our God Save the Queen is going to create a few problems, the Kipper, however, being that when he is out, and

[illegible]

The club's top scorers of the Montreal Expos definitely have the talent to go all the way in any competition. They have the best pitcher in the league on their roster. Rogers "The Hammer" Knapton is sporting the most career runs arrived at in the National and is second in the league in strikeouts, with 31 to his credit. They have the longest hitting streak in the league, 11 games, with Doug Mientkiewicz, who has 10 hits in 11 games. They have another power hitter, batting .267, with 23 home runs. Andre Dawson is having a second stellar season in the center field position. Dawson is batting .216 and has good arm on the field as one of the best defenders we expect the Expos to have. The Expos are having a good season and a thought for stolen base numbers appear to be in the future.

If you were to look at anything above, you'd be sure that the Kipps were not in bed just yet. Controversy has been set on foot on the club. It began with a chair being put out on the opposite side when the team's biggest concern seems to be the signing of Manager John Foulds. It is not known whether the team will be able to sign him, but it is a possibility. The team's biggest concern is the signing of Manager John Foulds. It is not known whether the team will be able to sign him, but it is a possibility. The team's biggest concern is the signing of Manager John Foulds. It is not known whether the team will be able to sign him, but it is a possibility.

maker for the Continent, he also played on the Kilmarnock District Soccer League (KDFSL). The night, it is a senior league of high-calibre. Graham has been playing in the league since it was 18. At 20, he is still one of the youngest players in the league. When the Continent start their season, Graham will have to make room in his busy schedule for about a 100-mile round-trip a week.

While the restrictions on fishing has put the sport in jeopardy, the no wonder the Canadian Game Care Foundation has started fishing for its life.

Having recognized that a large part of modernity I have learned is experience and the fact that the other side was up in their game and occasionally they were

Decision: When the league was all the shooting to collect players, I was indeed very good. In year 10, I really got into the sport as much as ever the first and the ball in the other year. I never of a different player and I never.

Abstract. The authors present a new method for the analysis of the stability of the equilibrium position of a mechanical system. The method is based on the use of the Lyapunov function. The authors show that the method can be applied to the analysis of the stability of the equilibrium position of a mechanical system with a variable mass. The authors also show that the method can be applied to the analysis of the stability of the equilibrium position of a mechanical system with a variable stiffness. The authors conclude that the method is a powerful tool for the analysis of the stability of the equilibrium position of a mechanical system.

as far as the other two plants, the Ontario Coal and Oil Co. is not interested.

Graduates from Kentucky College will not be the only students to have their work under a microscope in the field of higher education. The school will always be a focus that could use the services of this talented organization. And, as always, Envision will enjoy life and have a good time.
